

# EMI Calculator

Date : 10 – 11 - 2018

---

This project is demonstration of Client-Server Application.

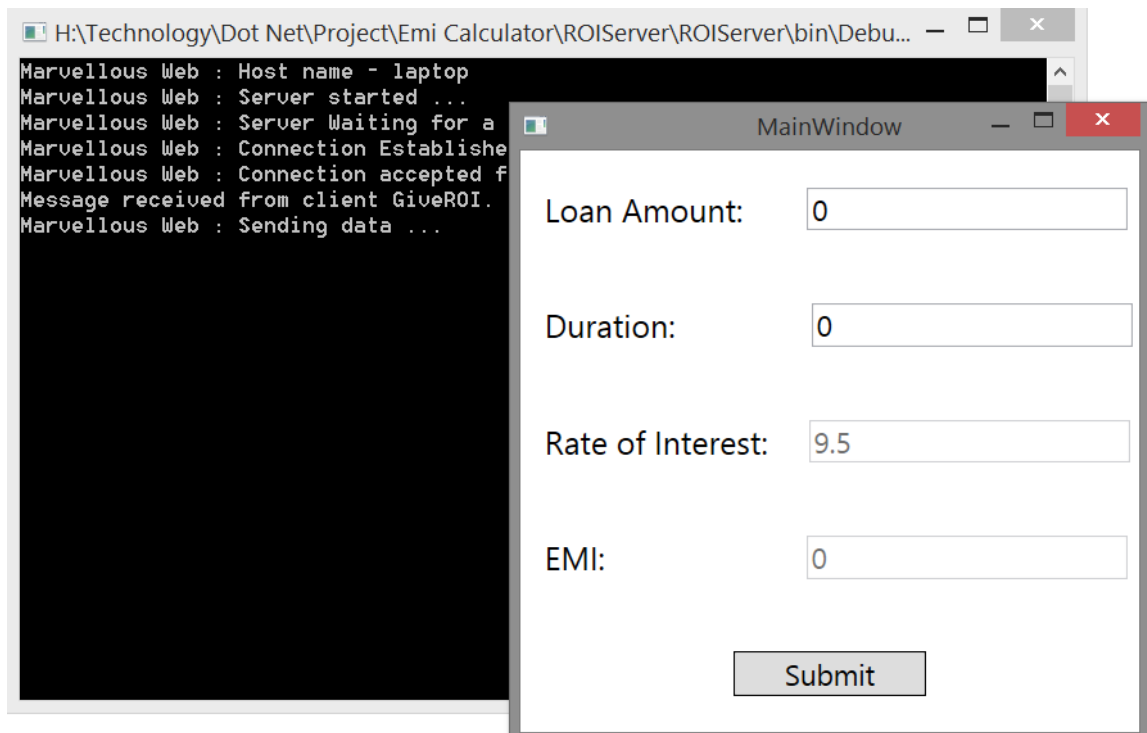

This Application is use to calculate EMI. ROI value is fetch from the server.

## Features:

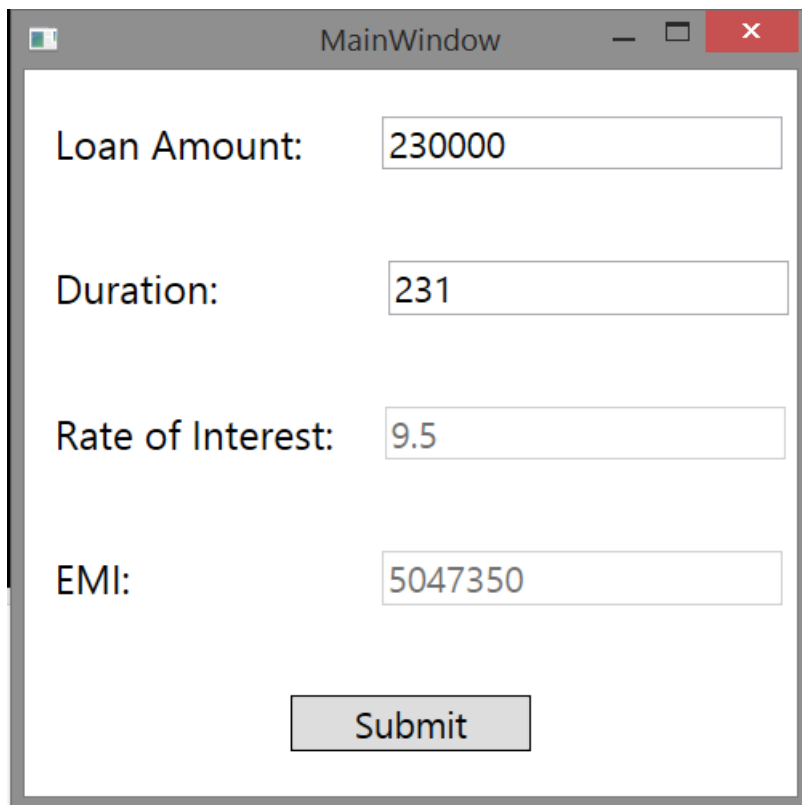

- Socket Programming.
- Server fetch ROI value from XML. So if we change the value in XML Then change will reflect to client.

## Project Screenshot

1. First Look of EMI Calculator.

## 2. EMI Calculation

The image shows a screenshot of a Windows application window titled "MainWindow". The window contains a form for EMI calculation with four input fields and a "Submit" button. The input fields are labeled "Loan Amount:", "Duration:", "Rate of Interest:", and "EMI:". The values entered in the fields are "230000", "231", "9.5", and "5047350" respectively. The "Submit" button is located at the bottom center of the form.

Field	Value
Loan Amount:	230000
Duration:	231
Rate of Interest:	9.5
EMI:	5047350

Submit
